This manual leads you through the installation and configuration of the vWorkspace application on Android mobile devices or tablets. This application enables a secure connection to our Clouddesk environment.

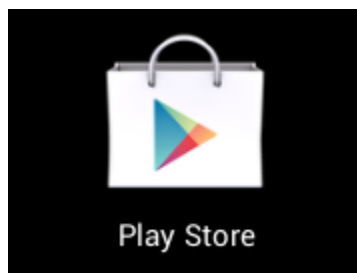

Installation manual Clouddesk Connector (vWorkspace) on AOS:

Requirements:

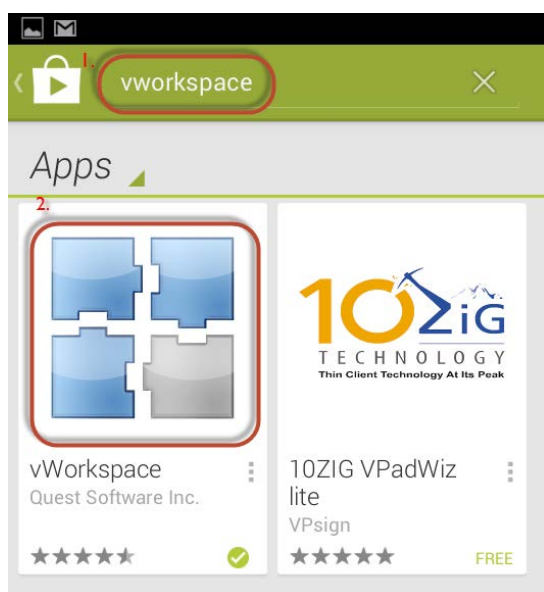

- Android mobile device or tablet
- Internet access on the Android device (WiFi or WLAN)

First of all the VDesk Connector Software needs to be installed. Open the Play Store for this:

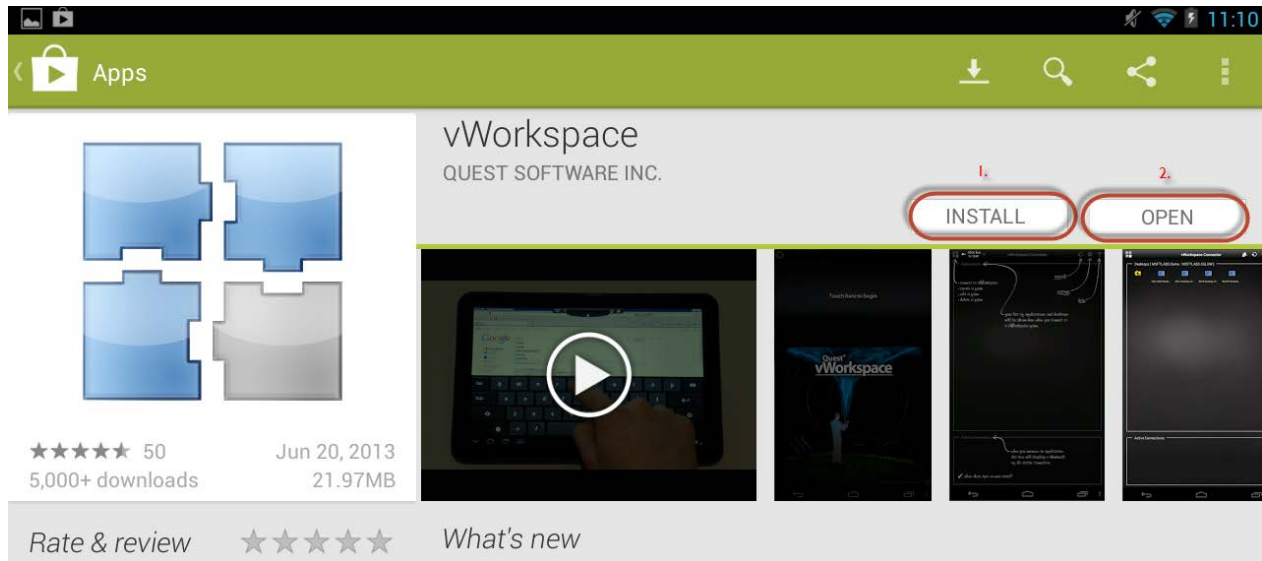

1. Open the **Play Store**

2. Insert (1.) "vworkspace" into the search mask and click on the software icon (2.) 

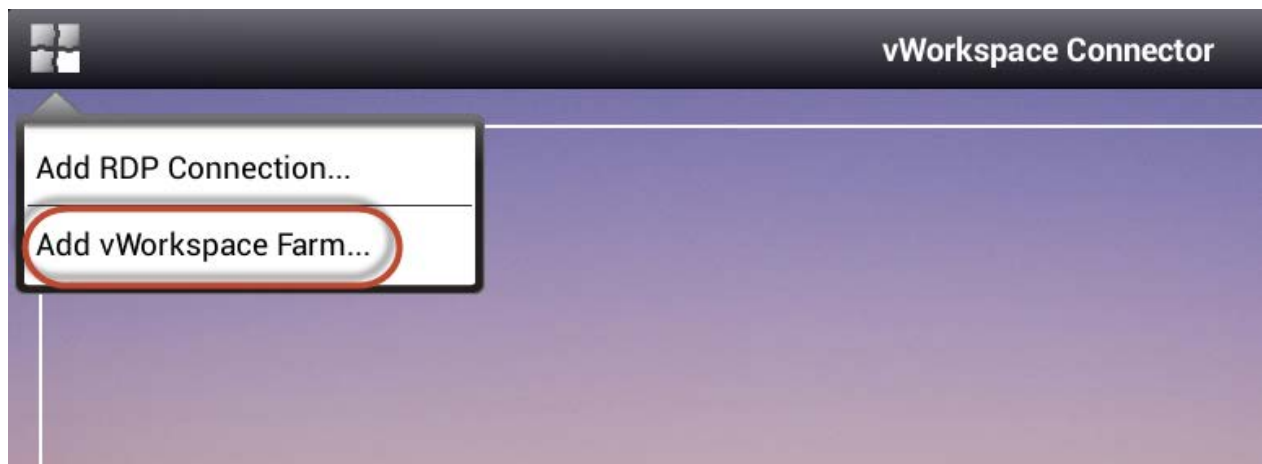

Click on (1.) **“INSTALL”** to install the software on your device
Click on (2.) **“OPEN”** to directly open the application out of the Play Store

Configuration of VDesk Connector (vWorkspace) on AOS:

1. Click on **“Add vWorkspace Farm”**

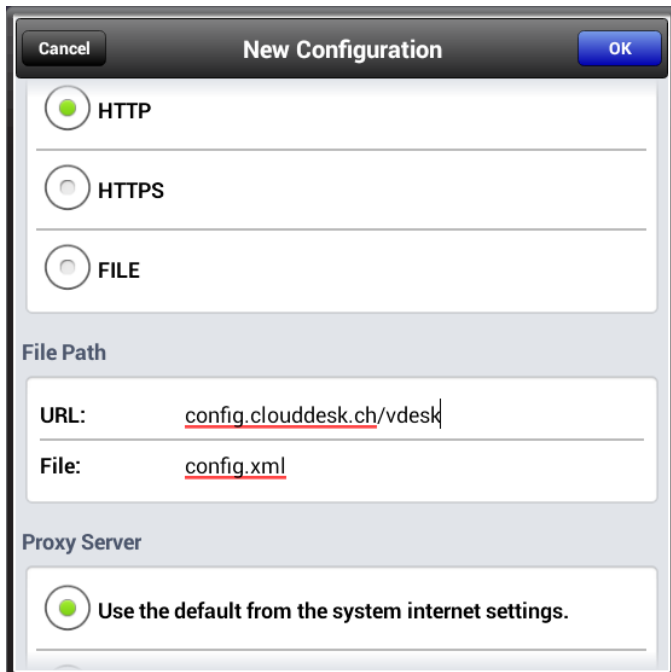

2. Click on “Download Configuration File”

The screenshot shows a dialog box titled "Add vWorkspace Farm". It has a "Cancel" button on the top left and a "Connect" button on the top right. The main section is titled "vWorkspace Connection Broker Information". It contains a text field for "Broker Name / IP" with the placeholder text "Enter broker name or IP". Below this is a section titled "Use the Following Credentials" which includes fields for "Username" (placeholder: "Enter your username"), "Password" (placeholder: "Enter your password"), and "Domain" (placeholder: "Enter the domain"). There is a checkbox labeled "Save credentials (encrypted)" which is checked. At the bottom, there is a button labeled "Download Configuration File" which is highlighted with a red circle, and an "Advanced view..." link with a right arrow.

3. Insert the following URL: **config.clouddesk.ch/vdesk**
Afterwards click on “OK” in the right upper corner

The screenshot shows a dialog box titled "New Configuration". It has a "Cancel" button on the top left and an "OK" button on the top right. The main section has three radio buttons: "HTTP" (selected), "HTTPS", and "FILE". Below this is a section titled "File Path" which contains two text fields: "URL:" with the value "config.clouddesk.ch/vdesk" and "File:" with the value "config.xml". At the bottom is a section titled "Proxy Server" with a radio button labeled "Use the default from the system internet settings." which is selected.

1. Enter the login credentials (user name and password) we sent you. Subsequently click on **“Connect”** to establish the connection to the Clouddesk environment

The screenshot shows a dialog box titled "Add vWorkspace Farm". It has a "Cancel" button on the left and a "Connect" button on the right. The main content area is titled "vWorkspace Connection Broker Information". Below this title, there is a text field for "Broker Name / IP" containing the value "vdesk.clouddesk.ch:443". Underneath, a section titled "Use the Following Credentials" contains three input fields: "Username" with the placeholder text "Username", "Password" with placeholder dots ".....", and "Domain" with the value "vdesk". Below these fields is a checkbox labeled "Save credentials (encrypted)" which is checked, indicated by a green checkmark icon. At the bottom of the dialog, there are two buttons: "Download Configuration File" and "Advanced view...", both with right-pointing arrow icons.

2. Click on **“Clouddesk Demo”** to start your desktop
